Hatfield to give us
6 inches of Rain
next year

Hatfield was engaged for next year by the Medicine Hat Agricultural Society last Friday

His contract calls for 6 inches of rain but he will only get paid for 3 inches of rain at \$4000 an inch, so if 6 inches of rain does fall he will get \$12,000.

Next year he will build his towers

about 60 miles northwest of Medicine Hat so that the west winds will carry the rains to the places where the moisture is being paid for.

It will be quite an exciting time for the Farmers who don't know, to give guesses as to the exact place where these towers will be pitched--because it may mean a "small fortune" to the Farmers who are lucky enough to be within reach of this moisture.

Some of the guesses will be printed next week

Farmers! be Sure
to put down Poison Bait before Seeding
Fall Rye and
Grasshoppers

We have received several enquiries lately regarding the likelihood of damage to rye from grasshoppers this fall. The grasshoppers will undoubtedly feed extensively on rye if no precautions are taken, but they can be so readily controlled by the use of a little poisoned bait that no one should allow the present abundance of grasshoppers to deter them from seeding this valuable crop.

The recent rains will bring on green growth elsewhere, and this will lessen the feeding on rye. In addition to this the roadside grasshopper, which is the most abundant of the grain-feeding species, is already collecting into its feeding grounds. By the middle of August it will have largely left the fields. Clean fallow land, seeded to rye will have practically no grasshoppers on it when the grain first comes up, though they will later work into the edges of the field for feeding. This will continue, with reducing severity, until well into September. If no steps are taken to destroy them they may spread in time over the whole field, and if the fall is as dry as it was last year they may feed so heavily that much of the rye will be unable to recover. This happened on many fields last year, but where poison was utilized the damage was held to the edges of the fields. All rye growers should therefore be prepared to use a little bait this fall in rye fields that they see are being invaded by grasshoppers in the same manner that they would use it in the spring to protect their spring sown crops from the young hoppers that are working into them from the edges of the fields.

Fifty pound soft bait will make sufficient bait to treat twenty acres of ground. The cost and labor involved is very small compared with the increased yield that will result, and no one should neglect to take this precaution for securing a heavy yield of rye next summer.

Immense good can also be done by applying some bait to the breeding grounds along roadsides, fence rows, old straw piles, etc. These are readily located at present by the fact that they are swarming, during the hottest part of the day, with yellowish grasshoppers, many of which are piled into little heaps. Poisoning these will not only reduce any damage this fall but this will be a good step towards holding down the pest for next year.

Hudsonian Entomological Laboratory, Lethbridge.

Will meet on Saturday
August 13th.

Farmers!
Make Money
By Raising Rye
Better To Have a Crop of
Rye Than No Crop
of Wheat

A movement is now on foot to encourage the production of Winter Rye in what is known as the dry belt of Southern Alberta and Southern Saskatchewan. Quite a large acreage was sown last fall and it has proven a great success. The raising of Rye in this part of Western Canada may be the means of solving the problem in this dry country. It is well known that Rye does not require as much moisture as other grains and produces about the same amount per acre as wheat does under favorable conditions we would like to see this cereal given a fair trial and we hope to see a large acreage sown with this grain this fall.

There is a large market for Rye throughout the world and several million bushels could easily be disposed of at a price about 25 cents less than wheat.

A good crop of Rye is far better than no crop of wheat and if it can be successfully grown in this section it would soon put the farmers in this country on a good financial basis.

The raising also makes a good feed for stock and will produce feed after the grain has been cut. It will also go a long way in solving the weed problem, as it will get a start before the weeds do.

The farmers in this section should prepare a good piece of their farm and plant it to Fall Rye this fall, and see what the result will be. It is almost a certainty that it will do better than wheat has done in this section in the past five years.

Would You Pay

\$40,000 for a Hog?

Three Hills Capital: C.F. and G. W. Doughty, of Twelve ranch, who own several prizes with their Poland China hogs at Calgary, bought a fine young boar descended from Big Bob, the hog that sold for \$40,000 in the United States.

Settlement Within The Empire Is Urged By Imperial Conference

London.—At the meeting of the Imperial conference the work of the Imperial shipping committee was overhauled and a suggestion to continue the committee under a royal charter was put forward and dropped in the absence of unanimity, it was learned here.

On the question of Empire news services the conference is understood to have contented itself with approving the resolution of the 1920 Imperial press conference at Ottawa on a reduction of press rates.

Among other subjects, the conference, it is believed, adopted an interesting resolution in the direction of an Empire-conference of officials with a view to obtaining a uniform system of granting passports.

A series of resolutions dealing with settlement within the Empire was adopted, the South African delegates dissenting from the scheme proposed in view of the limited field for white labor in South Africa.

Will Not Join With Canada

Resolution Introduced in Jamaica Legislative Council for Confederation Is Rejected.

Kingston, Jamaica.—A motion introduced in the legislative council by one of the people's representatives inquiring whether Great Britain would be willing to consider the possibility of the cession of its West Indies properties to the United States.

The representative declared that the people of these British colonies had no intention to become United States citizens and that the proposal made in Washington was repulsive. The opinion was expressed, however, that everything should be done to foster trade with the United States.

During the debate reference was made to the resolution introduced in the United States Senate last February by Senator Reed, of Missouri, inquiring whether Great Britain would be willing to consider the possibility of the cession of its West Indies properties to the United States.

Serious Fires in New Brunswick

Harvesters Taken From Train to Aid Fire Fighters

St. John, N.B.—Serious anxiety is felt by some residents of the district around Westfield, N.B., because of the condition of the forest fires. Some of the residents have gone so far as to begin packing their belongings in their homes should the path of the fire which is raging fiercely. Three forest fires, burning over a six-mile front, are menacing Westfield, Nerepis and Grand Bay. The Canadian Pacific Railway has sent a gang of men from this point to help fight the fires.

The fire in various parts of New Brunswick during the past week. The fires nearly always burned themselves out because of the dryness of the buildings and the wood shortage owing to the prolonged absence of rain.

Will Replace Obsolete Vessels With Battle Cruisers of Hood Type

Announcement Made That Policy Cannot Be Construed As A Challenge To Other Nations.

London.—Discussing the naval estimates in the House of Commons, Lieutenant-Commander L. S. Amery, parliamentary secretary of the admiralty, announced that the four replacement ships the government proposed to build would be armed with 16-inch guns and designed to obviate the need of larger destroyers than at present exist. He declined to say how many guns they would carry on the ground that it was not customary to give such information in advance.

Contrasting that policy with no element of challenge or provocation in this policy of replacing obsolete ships, Colonel Amery said it was simply a policy circumscribed within the narrow limits and postponed to the very last date consistent with the empire's safety.

Referring to the building programmes of the United States and Japan, Colonel Amery argued that the

Final Tribute To Caruso

Funeral of Great Italian Singer Held In Naples.

Naples.—The funeral of Enrico Caruso took place with great solemnity. From the royal church of San Francesco Di Paola, the cortege passed through streets lined with troops and vast crowds to the cemetery, where the body was placed in a funeral home.

Services were held in this famous church by permission of King Victor Emmanuel. A great choir composed of hundreds of singers assisted in the high requiem mass.

There were innumerable floral tributes, and a great wreath from the city of New York. All places of business had been closed as a sign of mourning.

Eulogies were pronounced by the prefect of Naples in the name of the King and the government, by the director of the concert company, and by representatives of the mayor and the artists of the city.

The basilica of the church was draped with black and gold tapestries, and the interior was filled with flowers.

The expenses of the funeral will be met by the municipality of Naples as a tribute to a noted son.

Fear Revolution in Portugal

Lisbon Appears to be Centre of the Trouble.

London.—A dispatch from Lisbon in Madrid states that following rumors from Vigo that a revolution had broken out in Lisbon, a telegram received direct from the Portuguese capital said extensive precautionary measures had been taken in that city.

It was further stated that the provinces and held in readiness, the added, but all was quiet in Lisbon and throughout the country.

Name Armistice Day To Open Conference

Appropriate Occasion to Begin Discussion of Disarmament.

Washington.—The United States will inaugurate to accept any date the Washington administration might desire for the opening of the forthcoming disarmament conference has led to the definite suggestion of November 11, armistice day of this year, as an appropriate occasion.

The subject of the matter has been the subject of informal conversations and while no formal announcement was available, it was stated that the British ambassador at once assured of British acquiescence, United States officials will put the original suggestion of armistice day to definite form for all the invited powers and await a communication from abroad.

The French Government gets \$50,000 a day out of the profits of one gambling casino.

May Reduce Freight Rates

Montreal.—That the Board of Railway Commissioners of Canada will in the near future take steps to reduce the freight rates on Canadian railways, was the announcement contained in a letter received by the local board of trade from Hon. F. B. Carvell, the chief commissioner.

The Montreal Board of Trade recently addressed a resolution to the railway commission asking a reduction on railway freight rates commensurate with the 25 per cent cut in wage now in effect.

Starving Peasants

Going To Moscow

Hunger Stricken People Setting Fire To Homes.

London.—The hunger stricken people in the famine districts of Russia are deserting their homes to go to Moscow. Many villages are said to be in flames.

It is also reported that great preparations are being made by the masses of peasants now moving toward Moscow. Many trenches have been dug about the city, and much war material, including field guns, installed.

Telegrams received at Helsingfors reports the Petrograd garrison has mutinied again.

Bush Fires Clear Settler's Land

Made Work of Removing Brush Almost Easy.

Cobalt, Ont.—According to a settler along the main line of the Canadian National a few miles west of Cobalt, the recent bush fires have not been altogether an evil. The conflagration, while destroying his haystacks and hay crop, made the work of clearing his land easy.

"At present prices the cost of clearing one acre of green bush runs up to \$200, but after the fires the trees had been felled and piled, I cleaned up two and a half acres for \$20. Generally speaking, a good burn allows the settler in moderate circumstances to go ahead and remove the bush, whereas it would be impossible to do so without a fire," the settler said.

Start Aerial Mail in Australia

Will Give Regular Service to Places Otherwise Inaccessible.

Melbourne.—The Federal government has accepted the £2,500 tender submitted by Major Brereton, of the Australian Air Force, for a weekly aerial mail service between Geraldton and Derby, covering a 1,200 mile stretch of the coast. The first official aerial post service in Australia, will start at the beginning of October, and will give a regular mail service to settlements impossible to reach otherwise.

Railway Wage Question

Chicago—The Union of American Railroad Workers Has Proposed a Strike.

Ottawa.—Claiming that the time is opportune for the submission of the question of wage reductions, as affecting the employees of Canadian railways, to a board of conciliation, President D. B. Hanna, of the Canadian National Railway, has notified the Minister of Labor that the management of the National lines cannot agree to invoking the Industrial Disputes Act for that purpose.

Mr. Hanna has pointed out that the agreement which the men have been asked to accept is only tentative and is subject to revision. He suggests that if the usual meetings and conferences consequent upon permanent schedule adjustments fail to bring an agreement on the question, it might then be necessary to resort to some form of arbitration.

Baseball Players Not to Play Again

Chicago.—The Union of American League players who were acquitted of an alleged national conspiracy to throw the 1919 world series, has any limitation of being re-admitted to organized ball, according to a statement issued by Judge K. M. Landis, National Baseball Commissioner.

Emperor Charles Has Hopes.

Geneva.—Unfettered reports still persist that Emperor Charles of Austria, has left Hertenstein secretly and now is in Hungary awaiting an opportunity to launch a coup d'état.

Be fair to your local merchants. Ask to see his goods and compare prices before sending your money to the mail order houses. You will find that it pays.

Free Entry of Stock to United States Is Urged.

Calgary.—The present conditions of the livestock industry in Western Canada was the subject of an address by C. W. Peterson, president of the Farm and Ranch Review, at an emergency meeting of the Calgary Board of Trade. The speaker pointed out that every person in Canada had a vital interest in the development of a successful livestock industry; it was the basis and foundation of the entire agricultural structure, he declared.

Mr. Peterson urged that immediate diplomatic discussions should be opened with the United States in order to secure for Canada free entry for animals and animal products. Even an unlimited overseas market, he said, could not be a fair market for Canada at the best of times, in fact a complete contrast to sunny temperate climates.

"We are facing an acute situation of free trade," he said, "and immediate action is necessary to cope with it."

Stockmen Want Assistance

Free Entry of Stock to United States Is Urged.

Calgary.—The present conditions of the livestock industry in Western Canada was the subject of an address by C. W. Peterson, president of the Farm and Ranch Review, at an emergency meeting of the Calgary Board of Trade. The speaker pointed out that every person in Canada had a vital interest in the development of a successful livestock industry; it was the basis and foundation of the entire agricultural structure, he declared.

Mr. Peterson urged that immediate diplomatic discussions should be opened with the United States in order to secure for Canada free entry for animals and animal products. Even an unlimited overseas market, he said, could not be a fair market for Canada at the best of times, in fact a complete contrast to sunny temperate climates.

"We are facing an acute situation of free trade," he said, "and immediate action is necessary to cope with it."

Rust and Saw Fly Harm Crops

Considerable Damage Has Been Done In Some Sections.

Ottawa, Ont.—Rust and the western stem saw fly have caused considerable damage in some sections of the western wheat fields, according to reports from crop conditions at the end of July. In some sections the anticipated yield has shrunk considerably owing to the rust, but at other places the heavy rains have caused a heavy yield. Crops will not be uniform, some sections having a bumper yield and others a disappointing one. Harvest is unprecedently early owing to the warm and, in some places, very dry weather during July.

Greeks Get Warning

Advance on Turkish Capital Will Not Be Tolerated.

London.—The Allies have warned Greece that an advance on Constantinople by her troops, which are now engaged in war with Turkish Nationalists, will not be tolerated. It was authoritatively stated here.

Great Britain, it was declared, is maintaining strict neutrality between Turkey and Greece.

Italian-Canadian Steamship Service.

New York.—Shipping circles here have been informed that the Navis-Generale Italian Line has directed part of its ships into a new Italian-Canadian service. This is the first time that Italian shipping has been established between Italy and Canada.

The reason attributed for the service is that Italian navigation companies are having great difficulty in finding business for their liners at the present time, due to the enactment of the present United States immigration law.

Famine Condition in Russia

New York.—Russian horses, which numbered thirty-six million before the war, have practically disappeared, having been eaten by the famished population. It was revealed in Russian newspapers published in Moscow and received here by the American relief administration.

Meat had grown so scarce, more than a month ago, that it rationed only to hospital patients. The Russian Empire Relief Administration in Moscow University were dismissed because they were not doing their best to improve their work, the papers said.

The Life of Ne-Gua-nan-I-sew

By O-G-E-MAS-ES (Little Clerk).

(Copyright)

Such a handsome, good natured, bright young Cree Indian when he first traded with me in 1884 and we soon became fast friends and called another Nechlow, meaning brother-in-law, an Indian term of endearment. He camped at my house a number of times and was the delight of my young children; in fact he always had an interested audience of old and young when telling Indian tales of the beginning of things, most of which I regret to say I have forgotten. How the loon received its handsome coat and power of diving, and the beaver was granted almost human powers of intelligence. In regard to the beaver it was a tradition amongst the Cree that at one time they were human beings but having offended the Great Spirit, loss of speech and the human form was taken away from them. Then there was a history for the bear, wolf and most of all criminals amongst animals the dreadful wolverine and the terror both of the white man and the Indian trapper.

At this time, so he gradually informed me, was very much in love with a pretty Indian maiden called Tannis, a daughter of the South-Western Cree who was a widow and I told me that at once if the course of true love had been running smooth, by his good spirits or the reverse. It appeared there was a rival named A-ke-ape-nas who, though a good deal older, was much better off in his worldly goods, and consequently appeared more to the young girl's mother. The appearance, however, did not appeal to her. Tannis at last, as owing to the burning of a gun, his check book had been broken which gave him a sinister expression, and further was a fair reason for a quarrel at the best of times, in fact a complete contrast to sunny temperate climates.

Mr. South-West, however, like many mothers, was anxious to see her pretty daughter make a good match and so he was the opposition to the parents to contend with. Tannis, however, finally brought matters to a head, by telling Nechlow that he was a man at all they must close up the positively refused to consider marrying Broken Peace, as the rival was commonly called. He said, and told me the whole story and asked what I would do under the same circumstances. Why, take the girl's course, was my reply.

It was the height of the berry season and the Indian women had begun picking and drying Saskatoon berries for winter use. A plan was arranged that Tannis and I should go down to her place and meet her sweetest at a place selected, he to have two ponies there ready to meet off morning and some days afterwards the newly married couple said a visit. There was no wedding ceremony, my dear friend, as these were both Cree Indians; simply living together made the

It is one of the saddest times to live alone in the wilderness and to be unable to help in times of severe illness. I have often realized with the resources of civilization precious lives might be often saved. Not only when sympathizing with poor Nechlow, but when my own family needed better medical skill than I could give them I would have been glad to see him. If ever a town grew up in the vicinity of my land there were two things I would try and get built as soon as possible, a hospital and a dispensary, the only thing I could do, and then a hospital. I am thankful to say I have been able to get them both established.

(To be continued)

Germans Will Help

Ready to Assist Transport of Allied Troops to Upper Silesia.

Berlin.—The French and British ambassadors and the Italian chargé d'affaires delivered to Foreign Minister Rosen, on behalf of their respective governments, the note asking the German Government to take requisite steps to facilitate the transport of Allied troops across Germany.

The note declares that the situation in Upper Silesia might at any moment require the sending of troops necessary for the maintenance of order.

It was learned later, on good authority, that the Foreign Minister had accepted the Allied representative's demand that the German Government should try to accede to the demand and would confer with the Minister of Transportation regarding the transportation of the troops.

Caruso Leaves Fortune.

London.—Mr. Caruso who proceeded to the Italian State to look after his husband's estate, according to a Rome dispatch to the London Times, latterly returned to Naples to make his home there.

Caruso, according to estimates in the newspaper, left a fortune of about \$300,000 lire. At the same time the value of the life this would represent about the sum of \$60,000.

Lays Eggs In Air.

London.—Two crates of valuable chickens which left Orington, Kent, recently at 9 a.m. were rushed to the London station to catch the 10 a.m. air express to Amsterdam. At Amsterdam it was found that two eggs had been laid by the chickens on the first case on record.

It is claimed, of eggs having been laid in the air.

Swends Wants Canadian Wheat.

Vancouver.—That Sweden is beginning to take an interest in Canadian wheat exports was evidenced in a letter enquiring into the possibilities of Sweden importing wheat from Canada, which was received by the Canadian Consul-General, Stockholm, received by the Vancouver Board of Trade.

Spending your money at home, thereby helping your own town and local merchants.

Three Men Killed.

Pittsford, N.Y.—Three men were killed and three seriously injured in the Standard Bilt Dyeing Company's plant, when an extractor on a "whirl machine" used in drying silk, blew to pieces. The whirling apparatus sprayed the nearby workmen and hundreds of scraps of bronze and iron.

Bow Island and surrounding Districts
will be in Bow Island last Sunday
in each month and will be staying at
the Hotel here, where any messages
can be sent or phoned to Mrs. Ridgdale

In any emergency as Sickens,
Infant Baptisms etc., the Rev. F. H. B.
Leacroft can be reached by phone
early in the morning or late in the
evening by calling up 124 Taber, dur-
ing the day Rev. Leacroft is always
busy with his outside parish duties,
but he is most anxious to assist in any
case he may be desired

Mr. J. Pollitt went to Medicine Hat
on Monday morning's train where he
has been during the past week under
the Doctor's care and expects to re-
turn home on Saturday

Mr. Alfred Miller left last week for
Irvine, Sask. to take in the threshing
around the Districts there, he is ex-
pected to be away for about two
months at least

Mr. D. W. Burnham and family
moved from Burdett into Steve Kin-
las' house south of the track, last
Thursday morning

A very heavy rain visited Bow
Island last Tuesday afternoon and also
on Wednesday night

Mr. Blaine and son Donald left for
Fredericton, N. B. last Wednesday

J. K. Miller and R. Calder Junior
left for Gull Lake Tuesday last

Perrin Baker M.P. left for Edmon-
ton last Tuesday he took the train
from Bow Island

Miss C. Anderson returned from
Calgary Sunday last

Mr. McMillar representative of the
Imperial Oil Co. is a visitor in town

Mr. T. Drinkwater left for Macleod
last Wednesday on account of sickness
he is being relieved by Mr. Ferguson
of Lethbridge

Mr. R. S. Beattie returned from a
trip in the Edmonton district on Wed-
nesday last

Mr. W. A. Bateman was a visitor to
Medicine Hat last Wednesday night

General Supt. J. M. Cameron and
Supt. C. D. MacIntosh passed through
Bow Island on Wednesday on a tour
of inspection

Herman and Russell Schorert ship-
ped the first car load of Rye yesterday
(Thursday) to Fort William through
Alberta Pacific Elevator. Mr. Peever
manager

Mrs. C. Johnson returned from
Medicine Hat on Wednesday

Miss Francis Ross entertained a few
of her young friends from town on
Tuesday evening, all present report
having spent a very pleasant evening

Mr. F. McLane of Medicine Hat was
a caller in town on Tuesday. He was
accompanied by little Merle and Earl
Sicles

Mrs. Ingalls and sister left on Mon-
day for Toronto

Miss Helen Newell, who has been
teaching at Manyberries is visiting at
present with the Misses Dewey

United Church Bow Island

Sunday Services
11 a.m. Preaching at Holy Cross
3:15 p.m. Preaching at Fairlight
8 p.m. Preaching at Bow Island

WINNIFRED

Mr. H. T. Luther is certainly advancing
in a wonderful way with his prize
winning flock of birds, at Taber Fair he
was the chief prize winner, taken
first, second and third on his Columbian
Wyandottes and R.C.W. Leg-
horns, the local exhibition was ex-
ceptionally good this year, H. B. Myers
of Taber exhibited a large number of
high class birds winning prizes in all
his group

Cutting grain is general this week,
quality and quantity will soon be
known, yield per acre will be very
small, hay and feed only half fed
enough, no labor required Farmers
exchanging work

Farmers are anxious to increase
average of Rye, if Seed could be
secured by the Government assistance
thousands of acres would be sown
more attention is being paid to dairy
poultry and mixed farming this year

Raymond Provincial School of Agriculture

Offers Free Courses in Agriculture And Domestic Science

To Boys and Girls over 16 years of age

Courses Include The Following Subjects:

Agriculture

Irrigation
Field Husbandry
Animal Husbandry
Veterinary Science
Farm Mechanics
Dairying
Poultry
Gardening
Chemistry and Physics
Farm Management
English and Arithmetic
Entomology
Civics

No Tuition Fee

Domestic Science

Cooking
Foods
Physiology
Home Nursing
Sewing
Textiles
Laundry
Household Administration
English and Arithmetic
Gardening
Dairying
Poultry

No Entrance Examination

In Session from October 27th. to March 31st.

For Particulars and Application Forms, apply to:

O. S. Longman, B. S. A.

Raymond, Alta.

A. E. Meyer, L. L. B.

Superintendent of Schools.

Department of Agriculture, Edmonton, Alta.

Mr. P. O. Warner and son Cecil left
this week to secure work at Coadale
and Barons

Mr. C. D. Herrington has taken the
farm over that was rented to Herbert
Rapsen by mutual agreement, Mr.
Harrington to end the entire crop and
feed

Mr. and Mrs. Frank Lawson made
a trip to Cypress Hills, last week

Miss Dora Kendall returned from
her visit at Orion at the home of Mr.
and Mrs. Chapman

Mrs. W. O. Long was in Medicine
Hat last week visiting friends

Mr. Dan McDougall, Government
Weed Inspector is touring this district
this week

Mr. Henry Gray is home to visit his
mother he has been at Lacombe two
years, he will remain at Winnifred
during this season

Local market prices remain the
same, butter 16c, eggs 25c, week ending
August 11th.

Miss Leta, Antonia and Fred Keller left
Monday August 8th, to join their
father at Meacham, Sask. where they
expect to reside Mrs. Keller will leave
in September

Mr. M. H. Smith spent a couple of
days in Medicine Hat this week having
dental work done

The Local Red Cross Ladies were
selling Ice Cream Saturday August
10th. Mrs. McFarlane, Mrs. Gosselin
and Mrs. Campbell presided over the
sales

Born—to Mr. and Mrs. Leonard Schan
sons of Winnifred, last Sunday, a fine
baby boy. Dr. Cairns attended.

Mr. T. Winchcombe of Winnifred
spent a few days last week at the
Porcupine Hills where his wife is on
an extended visit with her parents

Mr. and Mrs. Ed Gosselin of Win-
nifred were business visitors to Med-
icine Hat last week

Mrs. Warner was in town shopping
on Tuesday last

Monday evening August 8th, Win-
nifred was visited with a heavy
shower accompanied by hail north of
town it came in full velocity while
south they only had a sprinkle during
the night and Tuesday morning
another good rain fell

Mrs. Lulu Warner returned to
Champion Saturday August 6th.

Miss Lulu Smith returned from her
visit at Banff and Lethbridge where
she went to recover her health being
affected with rheumatism

Mr. A. E. Kendall attended the
Hartfield the Rainmaker meeting in
Medicine Hat last week

Mrs. Jas. Larsen accompanied friends
and motored to Glacier park, Montana
for a few weeks pleasure outing

Schedule "A" MORTGAGE SALE

PURSUANT to the Order of His
Honour Judge Jackson made herein
the 19th. day of July, A.D. 1921 in a
certain action wherein the Imperial
Life Assurance Company of Canada is
Plaintiff and Frank C. McLane admin-
istrator of the estate of Thomas Lath-
er Kenna deceased, is Defendant, the
following lands in the Province of
Alberta, namely: the south-east quar-
ter of section Twenty-Five (25) Town-
ship Nine (9), Range Ten (10), west of
the 4th. Meridian, RESERVING to
the Crown all mines and minerals will
be offered for sale by public auction
on Wednesday the 17th. day of August
A.D. 1921 at the hour of twelve o'clock
noon at the post office in the Town of
Bow Island in the Province of Alberta.
SALE will be subject to a reserved bid
to be fixed by this Court.

TERMS and conditions will be made
known at the time of the sale or can
be ascertained from the undersigned
Solicitors.

The said land is situated about eleven
miles South of Winnifred and about
fifteen miles South-East of Bowland
Upon the said land there is said to be a
house. About 60 acres of the said land
has been broken. All of the said land
is good level arable land.

Dated at the City of Lethbridge, in the
Province of Alberta, this 10th. day
of July, A.D. 1921

AUCTIONEER.

Studebaker Men Booming Transcontinental Highway

Studebaker Light-Six which passed through Bow Island carrying Transcontinental Road-Building Message to Mayor of Vancouver

Carrying a transcontinental road-building message addressed to His Worship, the Mayor of Vancouver, W. B. Palmer, sales manager, and M. F. Rigby, of the Studebaker Corporation of Canada, Ltd. arrived in Bow Island last Saturday afternoon at 6:11 p.m. on their way to Vancouver having gone as far east as Winnipeg.

The message bearers left Calgary July 11th, they say making a complete circuit of the prairie provinces, calling on the Mayors of the principal cities and obtaining their signatures endorsing the message. Following many stops which they will make along their route, they plan to arrive in Vancouver about August 15th. The Studebaker Light-Six Car they are driving, because of its conspicuous lettering on each side, attracted considerable attention while on the streets of Bow Island.

The message addressed to His Worship is in the interest of completing the connecting links in the transcontinental Canadian highway through British Columbia. At the present time in order to drive through to the Pacific Coast, it is necessary either to make a long detour into the State of Washington, or ship the car by rail between those points where no highway exists. The message by being conveyed by Messrs. Palmer and Rigby to the chief executive of the city of Vancouver urges him to use every effort in enlisting the active support of automobile clubs and good roads associations throughout the province in order to bring about some definite and immediate action towards the building of those sections of highway requiring construction.

"The completion of the highway links through British Columbia will greatly increase the number of motorists passing through Bow Island to the coast," said Mr. Rigby. "For that matter it will be of tremendous benefit to all of the prairie provinces, for many people who are now compelled to take roads running through the United States will gladly select an all-Canadian route so as to have the opportunity of visiting Canada's fertile West and passing through the Canadian Rockies."

High Average Production Shown By Farm Lands Throughout The Dominion

While Canada comes into open competition with the world on the quality of her agricultural produce of all kinds and can grow on her fertile farm crops of the world's quality, it is unable as yet to enter into competition in the matter of total production. A vast portion of her rich agricultural lands, amounting to many millions of acres, and forming potentially one of the world's great farming areas, is undeveloped and awaits settlement and the plough before producing to capacity in the manner that has made the quality of Dominion crops famous.

Canada can, however, come into open competition with other countries largely agricultural, the United States, for example, with respect to the fertility of her land, its growing conditions and farming season. Compared to average production, Canada makes a very fine showing. A comparison between Canadian and United States production for the past three years shows that Canada has maintained a high standard in all the crops she cultivates, and has in the majority of cases exceeded the average achieved by the other producing country.

It is not so long ago since doubt was expressed that it would be possible to grow wheat profitably in Canada. Canadian farmers answered this by taking most of the premier honors in the crop at international exhibitions. Not only that, but it is apparent that the Dominion preserves a higher average production throughout the country in both winter and spring wheat varieties than the United States, taken as a whole. In the year 1920, when the production of spring and winter wheat in the United States was 10.8 and 15.3 bushels per acre respectively, Canada secured an average of 24 and 24 bushels. In the previous year, 1919, with a United States production of 8.8 and 14.9 bushels, Canada's average yields per acre were 9.9 and 12.7. To go back another year, they compared 16.2 and 15.2 as against 10.75 and 10.0, the United States obtained a greater average of spring wheat in that season.

A comparison of the respective yields of the past three years in oats indicates that Canada, although she secured most of the international honors for the quality of her product, has fallen behind the United States in average production per acre. Whereas in 1920 her average production was 31.50 bushels per acre, that of the United States was 34 bushels. In the previous year, when she produced 26.2 bushels, farmers across the line managed to yield 29 bushels. In the year 1918 the yield stood at 34.7 and 28.74 with the United States in the ascendancy. These slight differences are recorded in barley, the average yields being 25.6 and 24.75; 22.4 and 21.75; 26.3 and 24.75.

There would appear to be no doubt left as to the greater suitability of Canadian land to potato production as a survey of the comparative figures of production. Against the United States average of 10.6 bushels to the acre, 21st year, Canada produced 17.8 bushels. Her yield in 1919 was 15.59 against the 90 bushels reached across the line. When the United States produced 9.9 bushels in 1918, Canada achieved 14.2 bushels.

Slight divergencies only are observed in the hay yield of the two countries, both in the same and wild varieties. Taking the average of all the hay produced, the United States secured a slightly higher production in 1920 when the yield per acre was 1.34 ton against Canada's 1.30 ton. The advantage is substantially Canada's to the acre, 21st year, Canada produced 1.55 and 1.40 against 1.36 and 1.15.

A Mediterranean Cruise.
The Canadian Pacific Railway steamer "Empress of Scotland," which was to have been used by the Montreal-Liverpool run, has been chartered to F. C. Clark for his seventeenth cruise of the Mediterranean Sea. The ship will leave for England, passing through the Mediterranean port, stopping eighteen days in Egypt, and return via Liverpool. She is now being refitted in England.

Immigrants From Britain.
During the months of April and May, a total of 28,945 immigrants entered Canada, 15,559 being from the British Isles, 8,745 from the United States and 4,691 from other countries.

Stall, Small Voice.
"But, Tommy," said his mother, "you're a little fellow, you can't tell me how you're doing."
"Yes," replied Tommy; "but I don't believe anything I hear."

First Auto Race Winner Made 33 1/2 Miles in Ten and a Half Hours

Henry Ford and H. H. Kohlsaat, the veteran Chicago newspaper publisher, were talking over old times recently, when reference happened to be made to the first "horseless carriage" race ever held in America. This race was started by Mr. Kohlsaat's newspaper, the Times-Herald, Thanksgiving Day, 1895, almost a quarter of a century ago. A host of cars were entered on paper—fewer than a dozen were able to reach even the starting point. Others did not get within yards from the tape line and only three succeeded in getting back, the winner of the first prize making the 33 1/2 mile course in 10 hours 25 minutes. And at that they had to be given an occasional push up inclines. Nevertheless the event aroused tremendous interest in trade circles and the attendance was large. Henry Ford, however, was not among those present. The reason here is Mr. Ford's own words: "I never wanted to see anything so badly in my whole life as I wanted to see that race. But I was in Detroit and it was in Chicago. The distance was too far for me, I hadn't a car and I couldn't find anyone willing to lend it to me." Today Mr. Ford is making millions probably more rapidly than any other man in the world, with the exception of John D. Rockefeller.

Dog Followed Master To War Front

Irish Terrier Tracked Private to Trench in France.
Prince, who was one of the most famous dogs in the world, was just died at the home in Stafford, England, of the family of his master, whom he tracked to the battle front in France.

Private Brown, of the Staffordshire Regiment, was ordered abroad in 1914 and left this Irish terrier behind him. A few days after he left home Prince was missed, and a fortnight later he, in some unexplained manner, arrived in the trenches near Arras, where he found his master.

After several months at the front, Private Brown was wounded and sent home. The dog was found in the rear area and the dog was sent home.

It is calculated that 165,000 tons of coal fall on London every year, as the result of the combustion of the 17,000,000 tons of coal Londoners annually consume.

Manless Battleships

Crewless Ships May Be One Of The Wonders of the Next War.
A photograph of unusual interest has been made public by the U.S. naval department and reproduced in many newspapers. It shows the old battleship Iowa steaming off the coast of Virginia without a soul on board, while army and navy airmen shower dummy bombs on it as it is. The Iowa was controlled and steered from the battleship Ohio, five miles away. Perhaps the crewless battleship will be one of the wonders of the next war—Edmonton Bulletin.

An Expensive Cuff.
It occurred to someone recently that the sounding of a cannon at bedtime would be just the proper thing for Calgary, but after consulting the military authorities it was found that this method of reminding the citizens of their slumber hour would cost the city \$25 a day. The military authorities said they would be willing to put over the nightly bawling. They have only 18-pound guns, and to shoot them over the side of warning the children to go to bed would burn up money too fast. It would mean about \$7,500 a year. The city is considering something else.

Here and There.
"Experiments have shown that it is a good idea to place any special article a store wishes to push in the window at the end of the main store street," said the statement in a paper called "American Business Methods." The reason given is: The customer hesitates and generally looks in to see if he is getting the door with his right hand. Another strategic point recommended is the store's exit: "A placard should face the customer as he is ready to leave the store."

B.C. Paper For Antipode.
The movement of paper from British Columbia paper mills to New Zealand and Australia has shown considerable expansion and transportation companies are anticipating yet more increased activity. All ships now sailing from Vancouver carry four hundred to five hundred tons of paper each.

Fortitude Not Always Heroic

Low Organisation Sometimes Accounts for Resignation to Suffering.
In reptiles and certain animals the brain is small, a peculiarity which explains their slight intelligence and the almost entire impossibility of teaching them anything. They can, it is true, be tamed; but although they seem to know individuals, they do not seem to be susceptible of affection; the slight compass of their brain renders them very intemperate. This incapacity to pain enables them to support mutilations which would prove immediately fatal to most other animals. A tortoise will continue to live and walk for six months after it is deprived of its brain. It is obvious, therefore, that three kinds of creatures can endure very splendidly that which, in the ordinary way, would be called pain, not because they have fortitude, but because they have incurability. They remind us of this in many men and women who get great credit for their fortitude in enduring the trials of life. Some are praised for their religion, others for their philosophy, others for their magnanimity, when investigation will often reveal the fact that the real reason of their composure is to be found in their low organization.

When a moral hero bears pain with bravery he does so at an immense effort, because, since he has capacity for vast feeling, so also he has capacity for vast suffering. When a dull and stupid man endures suffering with resignation it is usually because his nature is not endowed with high sensitivity. Extremes meet, and he often takes his stand by the hero and is applauded for virtues which he does not possess.

Seven million coins are turned out every week by the British mint. One week's output of coins would, if laid out in a single layer, make a gold, silver and copper carpet ten yards wide and more than a quarter of a mile long.

Getting Back.
"To think that arling should ever come back to me," said a man. "To what?"
"Just now I heard a moving picture star return to the stage as the speaker."—Youngstown Telegram.

In the days of Babylon the doctor or surgeon who failed of a cure frequently was condemned to have his hands cut off by the public executioner.

DISTRIBUING IMMIGRANTS

Two thousand immigrants have arrived in a single day at the port of Quebec. They have landed from three Canadian Pacific Ocean Liners; they have been inspected, examined and doctored by officials and inspectors—governmental and railway; their foreign money has been exchanged for Canadian currency, what remains is the process of distribution and assimilation.

Two thousand crowd the Government Immigration Hall, waiting to make another leg of their long journey.

They have come from Everywhere and are going to Everywhere. The mad of Europe and the British Isles are represented in this mass of humanity—sturdy Scandinavians from Northern Europe, dark workmen from Denmark, Poles by the group and family, fleeing from their war-torn country; all the new Little Nations created by the League of Nations have contributed of their sons, as all the Central European countries in Ukrainian, Bulgarian, Czech, Slovak, and Russian. Swiss and Italian are also represented in the composite crowd, all making a human influx of a day that illustrates the mixture of races in this land of promise.

Another shipload follows these to the port of Winnipeg and all beyond to the going down of the sun; the Ontario ones in trains pulled to Toronto, for redistribution from that centre. Families are given cars to themselves, women folks are treated of the same, and the single men have other cars to themselves, flocking together like birds of a feather. Many groups formed during the voyage and that have the same destination, are all permitted to keep intact.

The women-folks die are in charge of trained government "conductresses" who render a sympathetic service in a hundred ways that only travelling women and girls can appreciate, especially where babies are present, as they are most numerous. The train after it is filled, but not more than to capacity, and started—a new experience in the land far from a majority of them, as Quebec City is circled, and the old province is entered, the largest in all Canada, passing the quaint farmsteads of its inhabitants, all eyes are centred on the landscape and the New World—F. V.

To Make A Survey Of The Dry Areas In Two Western Provinces

Produce Trade of B. C.

Chinese and Japanese Getting a Strong Grip on the Trade of the Province.

That Orientals are getting an increasing grip on British Columbia's produce trade is indicated by figures compiled by the Provincial Department of Agriculture. More than 51 per cent of the potatoes produced in the province are now grown by Chinese.

Most greenhouses around Victoria district are now controlled by Chinese, according to the report. In the Victoria district, Chinese have 193,570 square feet under glass and produce large quantities of early tomatoes, lettuce, other produce and flowers. Vancouver 90 per cent of the produce supplied to the markets is produced by Chinese.

In the James Aschcroft and Lillooet districts, Chinese own 2,500 acres and lease 1,905 acres more, the report shows. Their holdings in these districts are in blocks, running as high as 600 acres. Recently more sales of land have been made direct from the white farmer, who finds he cannot make production pay, to the Oriental. Officials of the Department of Agriculture are now investigating records to find out just how land is acquired by the Japanese. Two Japanese in one district were interrogated, says the report, and explained that in acquiring land the system was for the Japanese purchaser to make a selection, and when the purchase was approved by the Japanese Consul the price was paid by that official. Of the 4,500 acres of small fruit in British Columbia, 2,341 acres are controlled by Japanese.

Town Planning Course.
An extension course in town planning will be given at the University of Toronto in the two weeks of January 9 to 21, 1921. Such subjects as housing, health, roads, pavements and the like will be dealt with.

If it were possible to collect in a human heart all the blood pumped by a human heart in one year, that reservoir would be large enough to contain about 1,700,000 gallons of water.

Oil Wealth of Northland

Oil, Gas and Coal Is Found To Exist Over Wide Area.
The wealth of oil and gas in the Canadian north is being revealed by the results of the Eskimotai are using the natural gas. There are soft earth formations into which they poke long sticks which they twist around. Gas comes out of the hole thus formed. They light it and have a flame for cooking. But no one knows what gas is called up there. Mr. Kelly went on: "It is only the oil they are after. They do not have to look for gas going out and breaking off pieces of coal for fuel in their stoves. All cooking and heating is done by oil piped from the well. As Eskimotai live at Fort Norman the oil is like kerosene. After it was strained through a mouse hole it ran a gasoline engine."

Settlers in Canada

A family group of settlers in Canada.

Carefully and cleverly the passengers are stowed away—the westward-bound in trains that will head for the port of Winnipeg and all beyond to the going down of the sun; the Ontario ones in trains pulled to Toronto, for redistribution from that centre. Families are given cars to themselves, women folks are treated of the same, and the single men have other cars to themselves, flocking together like birds of a feather. Many groups formed during the voyage and that have the same destination, are all permitted to keep intact.

The women-folks die are in charge of trained government "conductresses" who render a sympathetic service in a hundred ways that only travelling women and girls can appreciate, especially where babies are present, as they are most numerous. The train after it is filled, but not more than to capacity, and started—a new experience in the land far from a majority of them, as Quebec City is circled, and the old province is entered, the largest in all Canada, passing the quaint farmsteads of its inhabitants, all eyes are centred on the landscape and the New World—F. V.

Reindeer of the North

Farming conditions in Western Saskatchewan and Alberta are to be subjected to an investigation which is expected to have far-reaching and happy results. The first step looking to this inquiry were taken a few days ago by Vice-President M. A. Brown, of the Western Canadian Colonization Association, after consultation with the Saskatchewan board of directors and available members of the Alberta board, Lieutenant Governor Brett, James Ramsey of Edmonton, Pat Burns and General H. S. Noble of Northford, Alta.

The inauguration of this survey is in keeping with one of the primary objects of the association which is to make the lot of farmers already on the land and to retain existing settlers in the country. It is a work which has been carried on while the actual business of colonization is temporarily suspended, pending the conference of Provincial Premiers on land title legislation which is to be called by Hon. T. C. Norris once the new Alberta Government is inaugurated.

Its promoters believe that the decision to look into prevailing conditions in the south country will undoubtedly have the enthusiastic and unanimous backing of all the governments, legislators and other public men, and that the inquiry will be a great help to the settlement of the land and to the business of the province. The Premier of Saskatchewan, the minister of agriculture, the members of the Alberta and other cabinet ministers in both provinces are heartily lending their aid.

Oil Wealth of Northland

Oil, Gas and Coal Is Found To Exist Over Wide Area.
The wealth of oil and gas in the Canadian north is being revealed by the results of the Eskimotai are using the natural gas. There are soft earth formations into which they poke long sticks which they twist around. Gas comes out of the hole thus formed. They light it and have a flame for cooking. But no one knows what gas is called up there. Mr. Kelly went on: "It is only the oil they are after. They do not have to look for gas going out and breaking off pieces of coal for fuel in their stoves. All cooking and heating is done by oil piped from the well. As Eskimotai live at Fort Norman the oil is like kerosene. After it was strained through a mouse hole it ran a gasoline engine."

Utilize Arctic Wastes

American Comment on the Reindeer
The Canadians are a thrifty people, says the Cleveland Plaindealer, but they have not, until recently, suggested a practical way to get any return from their tremendous possessions. Now an suggestion of peculiar merit has been made, and it is to be acted on. Reindeer are to be introduced in several localities where there is a good chance of their becoming naturalized. The Alaska reindeer experiment has proved the value of the animals, and the Canadians are determined to repeat it on a much larger scale. With reindeer well established, Canada will have a new and important source of the meat supply. This, probably, is the chief consideration. But of scarcely less importance will be the service of the reindeer as a means of opening up new regions. Winter or summer the animals may be used in harness.

Decrease of Britain's Foreign Debt.
Great Britain's external debt now amounts to £1,161,563,000, a decrease of £100,000,000 since March 31, of £1,171,551,000, an official return states. The chief creditors are the United States, £372,704,000 and Canada, £53,339,000.

The library of the General Theological Institute in New York contains more than 1,200 different editions of the Bible.

Stolen Goods found in Russian Thistles 3ft. high

Re shop-breaking and theft of goods from Pleasant View Store on the night of July 28th.

Constable Bradner on Monday August 8th., with assistance was successful in locating the stolen goods on N.W. Quarter Sec. 13-10-14, receiving information that the goods were on this section Constable Bradner went there on Monday last in company with Mrs. Bradner and W.H. Scott of Winnipeg, after searching through a shallow ravine that runs through this farm from east to west the goods were located near the west side of the farm amongst some Russian thistles, the thistles were fully 3ft. high and was very difficult to get through. Constable Bradner found one sack and Mrs. Bradner found the other sack of goods. The goods were identified by Mr. G. H. Redknapp as the goods stolen from his store at Pleasant View on the night of July 28th. This is the final link in the chain of evidence in this case.

Police Court News

Re John Ekroth, Common Assault. The accused appeared at 2:30 p.m. on Saturday afternoon at Winnipeg before W.H. Scott J. P. charge read that John Ekroth did on or about July 1st, 1921 near New Dale School commit an assault on the complainant Joseph Weigel by threatening to knock him down, contrary to Sec. 291 of the Criminal Code of Canada. The accused pled not guilty.

Joseph Weigel, sworn, gave evidence of being at New Dale School on July 1st, at a picnic and that the accused had threatened to knock him down, this was at the time that Andrew Wineberger had Weigel by the throat.

Anton Weigel and E. Dragland sworn, corroborated the evidence of complainant, after hearing the case His Worship found the accused guilty and fined him one dollar and costs.

Freight Rates Cut is coming

MONTREAL Aug. 4.— That the board of railway commissioners of Canada will in the near future take steps to reduce the freight rates on Canadian Railways was the announcement contained in a letter received by the local board of trade from Hon. F.B. Carvell the chief commissioner. The Montreal board of trade recently addressed a resolution to the railway commission asking a reduction on railway freight rates commensurate with the 12 per cent cut in wages now in effect.

Farmers and Storekeepers generally will read with interest the above dispatch from Montreal, sent to them by F.B. Carvell.

Is it because they foresee an Election soon and want to tell the people that they are their friends?

12 per cent Reduction is better than nothing but everyone should remember that the Railway Companies got an increase of 35 per cent.

Why should the Reduction not have been 35 per cent also?

Farmers and Storekeepers will note that this man F.B. Carvell is always on the side of the Capitalists, the Millionaires and against the Working Classes or the poor man, as is clearly shown by his awarding the Big Incentives to the Capitalists.

We are of the opinion, that when the Farmers get into power at Ottawa (which they will do in this next Dominion Election) that this man Carvell will soon be pitched into the Scrap-Heap along with President Hanna of the Canadian National Railways (an Autocrat of the strongest kind) who tried to treat the Railwaymen as slaves, by putting out an Order that the Railwaymen shall not enter Politics and if they did they would be Fined.

Wouldn't that rouse the blood of any man?—we would say so.

Believe us they are going to get their medicine—it's coming.

Remember! Carvell and Hanna

Burdett News

Harry Phelps and Martha Long both of Grassy Lake were married recently at Taber at the English Church by Rev. F.H.B. Leacock, the families of both of them are very highly respected by all the neighbourhood—who offer them their hearty congratulations and wish them a long happy married life.

The Bakken Brothers are again running the threshing outfit owned by Ray Lindwall, they have just commenced operations.

Mr. W.C. Straley who owns a large farm south west of town, has just returned from Vancouver where he has lived for the past year, to look after his interests here. Mr. Straley states that he still has an abundance of confidence in this district, notwithstanding the last four dry years.

Do Not Sow Rye Until Hoppers Are Killed

Otherwise Farmers Will Be Providing Full Pasture for These Pests

"Winter Rye makes the fall pastures for grasshoppers," says M.L. Freng, agricultural representative, and unless farmers are careful to set out poison against them great damage will be done. The rye is about the only green thing in the fall months, therefore double precaution must be taken.

Supt. Fairfield, of the Lethbridge experimental farm, and C.S. Noble also strongly advise this precaution.

Mr. Noble had the experience of losing quite an acreage of Fall Rye last season before he found that the hoppers would attack it.

Burdett News

Mr. and Mrs. Geo. Kelly of Brownsville visited in Lethbridge last Monday.

A very heavy rain visited Burdett last Tuesday afternoon.

Miss Annie Walker, who has been away on her holidays is again back at the Post Office.

Mr. Chas. Scott and Mrs. Sibby of Grassy Lake left last week for Banff where they will visit for a few days.
